

OPPalyte™ MH347 film

Delivers enhanced seal performance and reduces total cost
in high-speed HFFS applications

Benefits

- very broad sealing range with excellent seal strength
- excellent stiffness, flex-crack and z-tear resistance
- outstanding packaging performance for high speed and robust HFFS applications
- stable slip performance
- outstanding opacity, white background and reduced show-through
- good moisture barrier

Protection

- OPPalyte™ MH347 film provides excellent seals and moisture barrier to protect product shelf-life

Performance

- with stable slip and a very broad seal range, OPPalyte™ MH347 film provides ease of machining and allows for high speeds on HFFS packaging equipment

Promotion

- high gloss, a bright white background, and excellent print characteristics combine to provide strong graphic appeal to showcase brands

Jindal Films' OPPalyte™ MH347 film is a two-side sealable film that has been designed to improve operations and reduce total cost of use by offering a sealable surface with a very broad seal range suitable for high speed HFFS packaging machines. This innovative film helps improve line efficiency, increase output, and reduce downtime and product waste. MH347 film is offered in three thicknesses (30, 35, 40 µ) and can be used for collation packs or individual packages.

OPPalyte MH347 is a medium-density cavitated white film that provides high opacity and a 'super white' opaque appearance. This enables design of glossy, eye-catching packaging to attract retail consumers, including impulse purchasers of on-the-go snacks and treats.

This film has excellent seal strength and offers very good ink adhesion and converting performance. MH347 film also has excellent stiffness and flex-crack resistance to withstand rigorous converting and packaging processes and avoid a shop-worn or crazed appearance.

OPPalyte MH347 film is ideal for:

- biscuits, cookies and baked goods
- chocolate and sugar confectionery (sweets and candies)
- detergent tablets
- other HFFS applications for food and non-food items
- collation packs

Count on Jindal Films

The Films Business of Jindal Films is a leading global OPP film supplier with the broadest range of aqueous coated film solutions for the flexible packaging market. If you're looking to develop innovative flexible packaging solutions, try Bicolor films from Jindal Films.
