

Bicor™ 84 AOH

Oriented Polypropylene Film

Product Description

Bicor AOH is a two-side coated OPP film designed for high oxygen barrier laminations. AOH is designed to be used as the outer web in gas-flush applications for dry products.

Key Features

- Excellent optical properties, non-yellowing
- Breakthrough barrier performance
- Outstanding oxygen barrier
- Outstanding flavor and aroma barrier
- PVOH surface is receptive to water-based or solvent based inks and adhesives
- Requires priming for extrusion laminations

Legal Statement

This product is not intended for or supported for use in pharmaceutical or medical applications requiring compliance with EU or US Pharmacopeia.

Processing Statement

- AOH is designed for packaging dry products such as dried fruits, nuts and crackers that require an oxygen barrier.
- The oxygen barrier properties of the PVOH coating will be reduced by the presence of moisture. For products containing high moisture content, thorough testing should be undertaken to ensure that the desired results are achieved.
- AOH is designed for use as the outer web of a lamination. In lamination to a hermetic sealant web, AOH is ideal for gas-flush applications.
- The PVOH surface is suitable for water-based or solvent-based printing and adhesive laminations. Contact ink and adhesive manufacturers for specific recommendations with this surface.
- The PVOH surface should be primed before extrusion lamination.

Footnotes

1. Product may not be available in one or more countries in the identified Availability regions. Please contact your Sales Representative for complete country availability.
2. Tested at 38°C (100°F)/100%RH, then calculated to 90%RH with .90 multiplier.
3. Sample dimensions and conditioning vary due to differences in equipment design.
