***Politica Ambientale***

**PROTECT TOMORROW. TODAY**

Jindal Films Europe Brindisi in all its activities is firmly committed to running its operating units aiming at the protection of the environment.

In conducting its business, Jindal Films Europe Brindisi wants to guarantee its customers by providing safe products; wants to respect the community through the preservation and protection of the environment.

**Philosophy**

**Protect the environment. Today for Tomorrow**

- Targeting the excellence in protecting and respecting the environment is essential to ensure the long-term future of the company.
- Management is responsible for respecting and protecting the environment; all members of the organization must act with the same awareness and with the same commitment.

**Principles**

- The organization is committed to ensuring that all operations and activities carried out within the plant are fully compliant with local and national laws and regulations.
- The organization is committed to minimizing the production of scraps and waste: the re-use of processing scraps, the internal recycling of scraps, the optimization of recycling practices and technological innovation are constantly monitored by Management.
- The organization is committed to ensuring responsible use of resources through
  - reuse of materials
  - recovery of process water
  - collecting rainwater for its reuse in operations
  - the use of renewable sources of energy
  - process optimization for energy saving
  - segregation of waste to increase its recovery and subsequent recycling
    - the reduction of waste to disposal, in favor of that to be recovered and recycled
    - optimization of the use of energy produced internally.
- Managers demonstrate constant commitment and strong leadership in respect for the environment by involving their collaborators in minimizing the risk of accidents that may have consequences on the environment.
- Responsibilities regarding the protection of the environment are defined and communicated.
- Adequate information, training, guidance and supervision are provided to all employees and contractors.
- Any accident or potential accident is promptly communicated to minimize the consequences. Preventive actions are implemented to reduce their impacts.
- The effectiveness of our environmental management systems and relative procedures are reviewed; incident analyzes and outcomes of periodic audits are used to stimulate continuous improvement.
