

## Label-Lyte™ ROSO™ films

For wrap-around heat shrink label applications

### Benefits

- Powerful shelf appeal
- Perfect fit on 3D containers
- Print quality - good receptivity with most inks, high print definition
- Appearance - high gloss and consistent shrinkage enabling attractive container and label design
- Converting - good product stability for storage and printing
- Supports label separation in PET recycling processes

Label-Lyte™ ROSO™ machine-direction (MD) oriented polypropylene heat shrink label films provide creative decorating option for high-quality graphics on complex shaped containers.

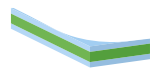

Label-Lyte™ heat shrink films create new opportunities for brand differentiation and powerful shelf appeal. They are designed for wrap-around labeling of contoured containers such as curved plastic bottles, aluminium and steel cans, aerosols, beaded metal cans and curved glass.

### Label-Lyte™ ROSO™ - MD shrink films

- Enables flexible and efficient use of reel-fed labeling equipment
- Consistent and uniform MD shrink on containers
- Good labeling performance and adhesive receptivity
- ROSO™ provides high modulus in machine direction for good print registration control
- High gloss transparency for attractive appearance
- Consistent slip for efficient ROSO™ labeling
