Improved barrier and pack display with Metallyte™ OPP film

Metallyte™ MU842 is a ultra high barrier, white opaque, metallized polypropylene film.

**FILM TYPE**
Metallyte™ MU842 metallized, cavitated white OPP film

**FORMAT**
Horizontal form fill seal (HFFS) packs

**MARKET SEGMENT**
Bakery – Cream Filled wafers

**APPLICATION**
“Minis” wafers from A. Loacker AG

**BRAND OWNER CHALLENGE**
Long shelf life and great pack appearance
Solution

- Metallyte™ MU842 film was chosen for its outstanding barrier, allowing optimum protection of sensitive filled wafers, combined with efficient packaging performance on HFFS machines across many flavor assortments.

- Excellent moisture, oxygen and aroma barriers are required to protect untreated/additive free filled crispy wafers (no preservative, no coloring, no hydrogenated fats).

- Converter friendly two side processible white metallized film for lamination on the metal side and cold seal receptive on the treated white side.

Features

- Outstanding barrier to moisture, gas and aromas.
- Glossy white treated side.
- Two side processible.

Benefits

- Outstanding product freshness with film protection delivering 18 month shelf-life to support global distribution from Loacker’s two European plants.
- Great stiff pack aspect with no-metal look using good print graphics and a clean inner white-look representing the quality and freshness of the wafers.
