

Enhanced product protection

OPPalyte™ 50MO747 is a white opaque cavitated oriented polypropylene (OPP) film acrylic coated on one side, sealable PVdC on the other side.

FILM TYPE

OPPalyte™ 50MO747 opaque cavitated, coated OPP film

FORMAT

Three-sides sealed sachet

MARKET SEGMENT

Dry beverages / Tea

APPLICATION

«Infusion Bio» tea sachets from Pagès

BRAND OWNER CHALLENGE

Product preservation and machine performance

“Infusion Bio” tea sachets
from Pagès

Solution

Replaced paper-based laminates with OPPalyte™ 50MO747 film to enhance the pack appearance and to allow excellent aroma preservation, thus providing Pagès with freshness and long shelf-life for various specialty teas with sealed sachets.

The OPPalyte™ 50MO747 film structure runs efficiently on Pagès IMA sachet machines with smooth operation and hermetic seals due to the film's stable surface properties.

Features

- Excellent aroma retention and good moisture barrier.
- Ease of converting on glossy acrylic coated surface.
- Mono-web white barrier sealant solution.

Benefits

- Improved product protection compared to traditional paper sachets.
- Good pack appearance with high gloss and clean white inside look compared to paper.
- Reduced material weight compared to laminates.
